One of the most important ingredients in high performance, long-lasting, durable and beautiful concrete produced today are concrete admixtures. Concrete admixtures are natural or manufactured chemicals or additives added during concrete mixing to enhance specific properties of the fresh or hardened concrete, such as workability, durability, or early and final strength.

Repair mortars are specifically designed for restoring or replacing the original profile and function of the damaged concrete. They help to repair concrete defects, improve appearance, restore structural integrity, increase durability and extend the structure's longevity. Our concrete repair mortars are suitable for restoration work, repair of spalling & damaged concrete in all types of structures including buildings, bridges, infrastructure and super-structures.

One of the most important ingredients in high performance, long-lasting, durable and beautiful concrete produced today are concrete admixtures. Concrete admixtures are natural or manufactured chemicals or additives added during concrete mixing to enhance specific properties of the fresh or hardened concrete, such as workabil-

An anchor is a steel element either cast into concrete or post-installed into a hardened concrete member and used to transmit loads to the concrete. Cast-in anchors include headed bolts, hooked bolts (J- or L-bolt), and headed studs. Post-installed anchors include expansion anchors, undercut anchors, and adhesive anchors.

Grouting is suitable where soil permeability would create a heavy demand on pumping or where ground conditions mean it may be economically inefficient to bore wells. Grout may also be used in the formation of pile foundations, ground anchors, under-reaming, underpinning, in road construction, dam construction, and other applications.

## Bonding Agent

### MasterBrace ADH 1414

Epoxy Bonding Agent

3 Kg Kit

## Anchoring

### MasterFlow 932 AN

Two Component Anchoring

400ml Cart.

## Grout

### MasterFlow 928

Non-Shrink Grout

25Kg Bag

## Water Plug

### MasterSeal 590

Repair and Anchoring Mortar

1.5Kg Bucket

## Swell Bar
