

### Appreciation Letter

To: Maimaar Steel Private Limited

Date: 02/03/2021

On behalf of Faisal Movers, we thank Maimaar Steel Private Limited (MSPL) for their efforts in executing the design, fabrication and installation of Bus Terminal Steel Structure in Karachi.

We floated the bid to different PEB Suppliers including Maimaar Steel to provide a proposal for Bus Terminal Structure based on our preliminary design. Maimaar was the only company to accurately conceive our concept of the structure and provide a very unique and functioning design of the terminal due to which, the project was single handedly won by them. The first phase of the structure (value PKR 4.95 million) has been completed by MSPL well before time and pleasing quality.

Now, the second phase of building (worth 15.34 million) is under design and we strongly believe that MSPL will meet our expectations.

For Faisal Movers,

Noorhan Maleez
